Spring for Research

RR Carlos Salomon

Dr OLLEBROODG

Spring is upon us... it's a Season for renewal and transformation - a time to look forward with hope and optimism. This year, Lions Medical Research Foundation will continue the **SPRING FOR RESEARCH** campaign, and we ask you all to step into spring and make it the season to assist the Foundation to achieve its fundraising goals.

LMRF is a community based. Not-for-profit organisation committed to raising funds for medical research to improve the quality of life for present and future generations. Our current projects include **Dr Olivia Holland's** research into gestational diabetes and the underlying mechanisms that link placental dysfunction to pregnancy complications and **Associate Professor Carlos Salomon's** research into ovarian cancer and his breakthrough in identifying markers that can detect ovarian cancer at its early stages through a blood test. In approximately 4 years, this new breakthrough blood test will be available to identify the cancer before it is too late.

Life changing and life-threatening illnesses can happen to any one of us at any time. Like the 11-year boy who contracted a throat infection that turned into an autoimmune condition that destroyed cells in a part of the brain – he now must live with a life-long condition so rare that his life and that of his family has been changed forever. The researchers funded by LMRF all work tirelessly in their fields to seek cures and solutions.

This year, you can help us advance this valuable and life-affirming research by holding a fundraising event or making a donation.
